Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5,7,8 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Nye et al ('831).

Figures 1-7 show structure as claimed, including blow-molded table top and seat members supported by pivotally mounted legs 39,76, and having a C-shaped foot member 26 slidably and adjustably couplable to the legs. The undersides of the table and seat members form rails (figs. 9,10) for pivotally securing the legs thereto, and include storage areas for the legs when folded.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nye et al ('831) in view of Drew.

While Nye et al does not disclose a connecting block for securing the support braces thereto, such a block structure is conventional and well known in the art as shown

by Drew (figs. 2,3,5) and to have utilized such a block in place of the shaft structure of Nye et al, would have been an obvious modification to one with ordinary skill in the art, as both provide a similar function.

Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nye et al ('831) in view of Nye et al ('623).

The use of angled leg members to support the seat of a picnic table is old in the art as shown by Nye et al ('623), and to have applied such angled legs to the seat supports of Nye et al ('831), by forming the telescoping seat legs and corresponding bent ends of the foot member at an oblique angle, would have been well within the level of skill in the art, thereby providing a more aesthetically pleasing support structure.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Smithers, Perzee et al, Gatto and Tseng show various features of the invention.
